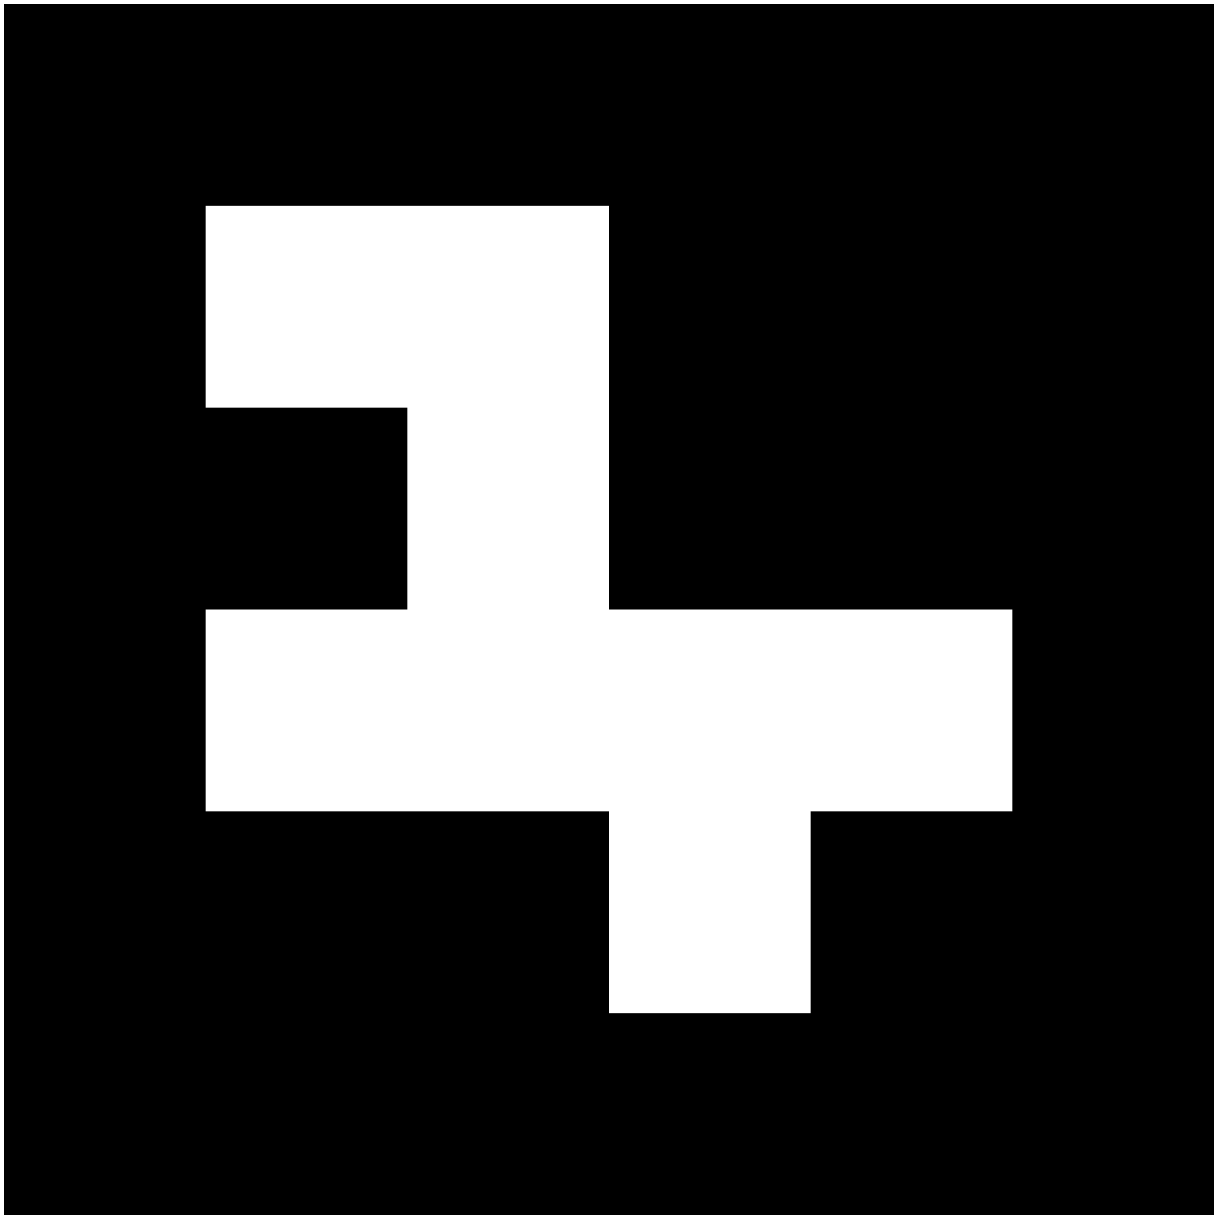
ON THE BACK: a tracker or controller goes here

Tape or rubber-band it on, its top sticking up past the top edge.

It just mustn't wobble, and mustn't cover the marker.



Tracker marker: DICT_4X4_50 id 7, 160 mm. Any print size works. Keep the white border.

Glue this sheet to stiff card. Mount the tracker or controller in the dashed area, on the back.

BOARD B

the marker card, for room calibration (step 2) and checking focus (step 1)
